Vital health technologies L.L.C (VHT) is a medical and research technology distribution company, based in Doha-Qatar, delivering services and solutions to the healthcare and clinical research industry. VHT provides its services to the entire GCC countries through our trusted partners from each nation.

The demand for a high quality healthcare environment is increasing vertically in the modern world. Vital health technologies plays a major role in accelerating the technology advancement in middle east by introducing cutting edge technologies from rest of the world to the local market.

VHT has been always unique in their approach to the customer requirements while assuring international standards throughout all our project implementations. Thanks to our highly experienced and dedicated team of mangers, application specialists and engineers for thinking in line with our client's requirements.

Vital health technologies is committed to provide fast service support to all our customers to ensure the proper functioning of the equipment and solutions that we delivered.

To become the first choice of every healthcare professional and clinical researcher as a technology partner..

Healthcare IT is one of the strongest area in our portfolio making the relevant patient/research data available with a finger touch. VHT provides medical and research IT solutions for a continuous flow of data connectivity between instrument interfaces.

We have reliable and proven IT solutions for RIS AND PACS systems, AV integration, ECG management systems, Bioinformatics, Big data storage and Lab LIMS.

## Medical Equipment

We deliver wide variety of high quality medical equipment used in the various departments like Critical care unit, Clinical imaging, Nuclear Medicine and emergency unit.

We provide bed side monitors, Ultrasound scanners, X-ray equipment, hospital beds and patient transport systems.

Our clinical laboratory products include plastic wares, glass wares, rapid test cards, transport medias, biosafety cabinets, fully automated analyzers used in chemistry, immunology, hematology and blood banks.

VHT is a strong provider of technology and equipment to the research laboratories associated with hospitals, universities and independent research organizations.

We provide biosafety cabinets, cell imaging, DNA sequencers, PCR amplification and Liquid handling robotics from reputed manufactures.

VHT's support team is behind our success in achieving a high level of customer satisfaction by ensuring maximum uptime of every solution we deliver.

Our manufacturer trained engineers and application specialists are just a phone call away to make your working environment hassle free.
